# Innovative Features and Rewarding Benefits

Features	Advantage	Benefit	Thermo Scientific Herafreeze Model
<b>Refrigeration System</b>	Up to 20% greater heat removal capacity over ordinary freezers. Ensures faster temperature recovery after door openings.*	Quicker recovery after door openings, ensuring protection of critical samples.	<b>Top, Basic</b>
	Consumes up to 15% less power than leading competitor.*	Cost of ownership is lower and is also friendlier to the environment.	
	Emits up to 15% less heat into the environment than leading competitor.*	Less heat is emitted into the lab environment thus requiring less energy and HVAC equipment to keep the lab environment cool.	
	Noise levels are reduced by up to 40% over previous generation, decreasing interruption in the lab.	A quieter freezer allows the unit to be placed directly inside the lab, saving time.	
<b>Microprocessor Control</b>	Set point controls for the temperature and alarm system.	More precise settings and flexibility for temperature set points and alarm controls.	
<b>PLUS Time Delay</b>	Programmable feature delays restart of a bank of freezers after building power failure allows stabilized power and a uniform re-start.	<ul style="list-style-type: none"> <li>Eliminates costs and down time associated with tripping a circuit breaker after a power failure.</li> <li>Reduces stress on the compressor and electrical components.</li> </ul>	
<b>On Board Diagnostics</b>	The system will report error codes, pointing the researcher or service technician to a probable cause.	Error indications will allow the researcher or service technician to diagnose problems faster, leading to lower down time inconvenience to the researcher and minimizing exposure to samples.	
<b>Automatic Voltage Buck/Boost System</b>	Buck will reduce incoming line voltage in the event the voltage is too high. Boost will provide additional voltage to incoming line voltage in the event voltage is too low.	This feature will add to the longevity of the freezer by stabilizing the voltage to the unit.	
<b>Optional Integrated Back Up System</b>	Integrated back up system is programmable at the user interface.	Provides user with assurance that samples will not be compromised in the event of a power outage.	
<b>Recessed Power Switch</b>	Power switch is recessed into the housing to keep the unit from inadvertently switching off.	Controls down time due to accidentally switching off the power supply.	
<b>Reinforced Shelves</b>	Stiffeners have been added to all stainless steel shelves for excessive loads and impacts.	Allows storage of high-load and non-standard samples, such as microplate hotels.	
<b>Door Mounted Pressure Equalization Port (PEP)</b>	The door mounted PEP does not take up valuable storage space and does not require maintenance (ice removal).	Periodic ice removal from PEP is not required, allowing the researcher to focus on his/her samples and not waste time maintaining the unit.	
<b>Voltage Indicator (Power Monitor)</b>	Voltage indicator button will provide incoming line voltage when pressed.	Provides fast and accurate information on incoming line voltage.	
<b>New Communication Outputs (Standard on Certain Models)</b>	4-20mA option for additional communication output devices.	Flexibility in options for connecting to remote alarm systems.	
<b>Battery Readout</b>	Readout is in actual voltage and not percentage of voltage in battery.	Provides user with assurance that alarms and displays will function in the event of a power outage.	

## Environmentally Friendly\*

**15% lower power consumption** reduces ownership cost and is environment friendly

**15% lower heat rejection** into the laboratory environment for a more comfortable work environment

**20% more heat removal capacity** for quick temperature recovery after door openings

**40% quieter** so they can reside in the lab; this speeds sample preparation and minimizes sample exposure to ambient air

\* Based on internal performance data

**SupplyLAB**  
www.supplylab.pt

## Safeguarding Your Precious Samples with Advanced Technology and Exceptional Quality

*Thermo Scientific Herafreeze ultra-low temperature freezers combine the highest reliability and superior performance with cost-effective operation and innovative features.*

*Our Herafreeze® freezers feature an advanced technology platform, refrigeration, microprocessor controls and high-quality construction, delivering:*

› **Maximum Temperature Recovery**

Up to 20% more heat removal capacity over ordinary freezers, ensuring faster temperature recovery after door openings.\*

› **Operational Efficiency**

Up to 15% less power to maintain cabinet temperature compared to other freezers.\*

› **Comfortable Lab Environment**

Quiet, comfortable operation allows our ultra-low temperature freezers to reside directly in the lab, creating a more productive and efficient work environment.

› **Environmentally-Friendly**

Up to 15% less heat into the lab environment, minimizing air conditioning costs.\*

## **NEW!** Thermo Scientific Herafreeze HD

Our new Herafreeze® HD freezers feature a highly-efficient, innovative thin wall insulation technology. This allows for expanded interior storage capacity without increasing the exterior cabinet footprint.

**SUPPLYLAB**  
www.supplylab.pt

**Access Port:**  
1" (25 mm) diameter  
for easy access  
through wall

**Robust Cabinet Design:**  
constructed of high-  
strength steel with a  
corrosion-resistant coating  
for long-life durability

**Cabinet Insulation:**  
minimum 5"  
(127 mm) CFC-Free,  
foamed-in-place  
urethane insulation  
(foam cabinet  
models) for thermal  
protection and  
structural strength

**Remote Alarm Contacts:**  
allows physical  
connection to external  
alarm/monitoring system  
providing alert capability  
if samples are at risk

**Stand-Offs:**  
prevents freezer  
from being placed  
directly against the  
wall, ensuring proper  
air circulation to  
prevent over-heating

**Recorder:** optional 7-day, 6" (152 mm)  
circular chart for validation and regulatory  
requirements. Standard on certain models.  
Check with your salesperson for details.

**Heavy Duty Casters:** new 2" (51 mm) locking,  
tandem wheel design; easy, smooth mobility

**PLUS Power Management System:**  
low voltage surge protection, voltage  
buck/boost capabilities

**Cryolatch™:** integrated door  
handle and latch for one-hand  
operation; built-in key lock and  
padlock compatible

**Easy-to-Use Microprocessor  
Controls:** programmable temperature/  
alarm set points and on-board  
diagnostics

**Washable Filter:** provides protection  
from dust on the condenser, causing  
reduced refrigeration performance  
and increased risk to samples

**Door-Mounted Pressure Equalization  
Port (PEP):** maintenance-free PEP  
allows for quick re-entries after door  
openings and eliminates the need for  
ice removal (PEP is hidden from view)

## Quality, Reliable Construction

*Delivering the highest quality you expect, our Herafreeze freezers feature robust, high-quality construction with your choice of foam or HD insulation, flexible storage and precision controls.*

### **Secure Inner Doors:**

high-impact ABS plastic with recessed handle

### **Outer Door Gasket:**

unique door seal with five points of sealing contact protects against heat leaks and minimizes frost build-up

### **Insulated Outer Door:**

minimum 3.5" (89 mm) high strength foamed-in-place urethane insulation

### **High Density Insulation (Herafreeze HD freezers):**

innovative composite thin wall design creates more storage without increasing cabinet footprint

### **Environmentally-Friendly, CFC-Free Refrigerants:**

DuPont® Suva 95 in low-stage models

### **Stainless Steel Interior Shelves:**

new reinforced shelves, developed for excessive loads and impacts

The world's largest ultra-low temperature freezer utilizes HD technology and saves valuable floor space

*Our 889 liter HD model features 10 inner doors to reduce sample exposure to ambient air.*

*Our Herafreeze racks are quality-built for ultimate sample protection. With proven reliability, our racks are completely interchangeable with all Herafreeze Top and Basic freezers.*

**Inventory Racks:** optional stainless steel with fiberboard boxes and dividers for complete sample protection

**SUPPLYLAB**  
www.supplylab.com

## **NEW!** Thermo Scientific 889 L Herafreeze HD

*The Largest Capacity Ultra-Low Temperature Freezer Available*

**Our 889 L freezer delivers the industry's highest capacity and vial to footprint ratio – store up to 70,000 sample vials in 35 inventory racks.**

### **More Capacity, Small Footprint**

Uses HD technology and design to allow 31.4 cu ft (889 L) of capacity in a 24.8 cu ft (702 L) footprint. Features seven optional racks per shelf and five shelf positions hold up to 700 2" (50mm) boxes, 525 3" (76mm) boxes or 3,430 microplates.

### **Ultimate Sample Protection**

Each inner door operates independently on a continuous hinge to protect entire sample contents from ambient thermal exposure.

### **Flexible Interior**

Five shelves, three adjustable in 1" (25 mm) increments, permit alternate inventory configuration.

### **Sophisticated Microprocessor Controls**

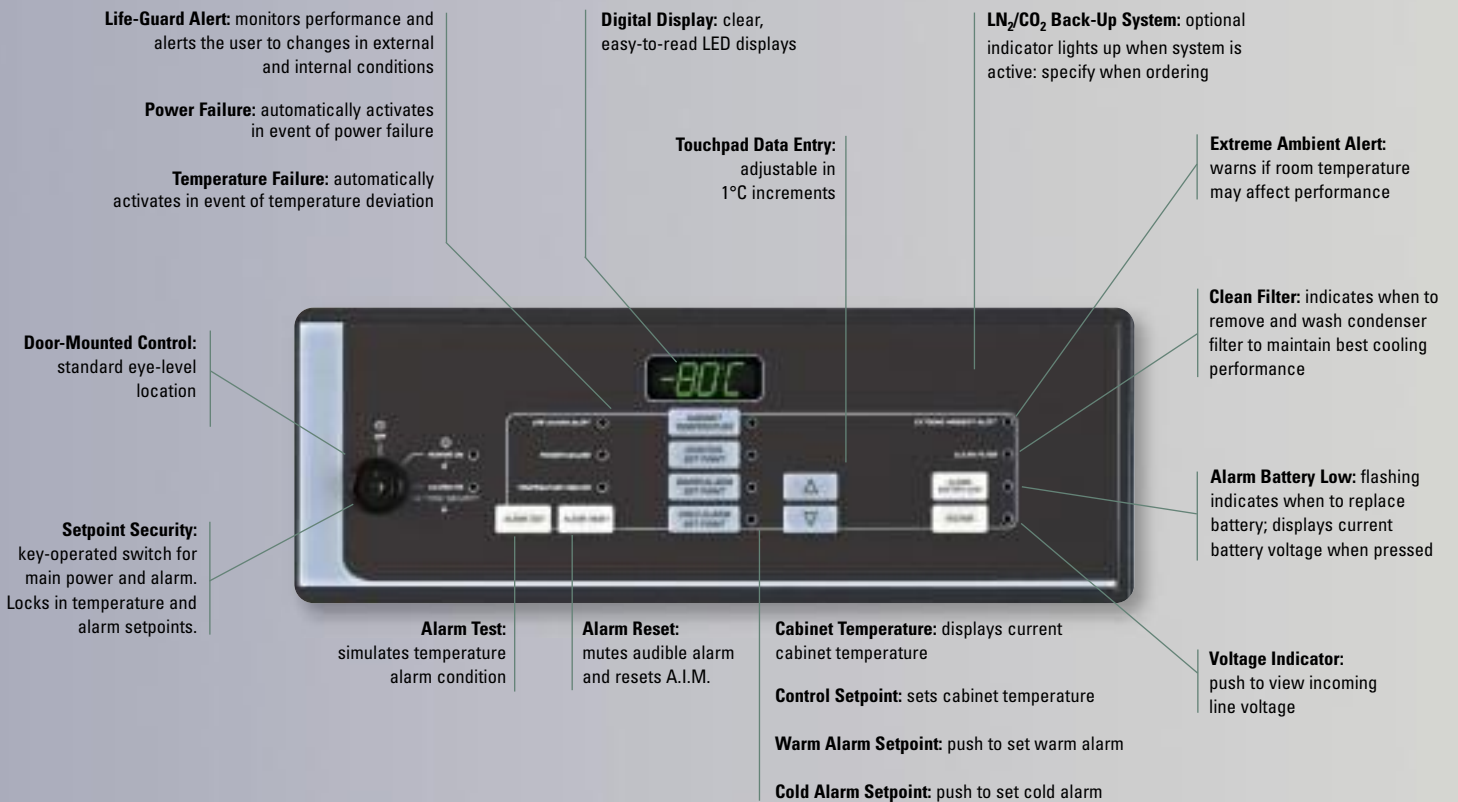

Our Herafreeze HD line features sophisticated, easy-to-read microprocessor controls – delivering industry-leading performance to protect the integrity of your work.

## Storage Capacity Comparison

Store up to  
**70,000 samples**  
– more than  
any other freezer  
on the market!

## Herafreeze HD Control Panel

### Additional Features:

#### PLUS Power Management System:

- **Low Voltage Surge Protection:** minimizes voltage spikes; protects sensitive electronics
- **Voltage Buck/Boost:** protective device used to correct low or high voltage into the unit; protects and extends the life of electrical components

**A.I.M. Automatic Incident Monitor:** identifies temperature deviation (due to power failure or temperature failure) beyond alarm setpoint

**Battery Backup:** continuous charge provides full function to control panel in case of power failure

**On-Board Diagnostics:** continuously monitors sensors to ensure proper performance

**NEW! Standard Features:** Chart recorder, RS232 output and 4-20 milliamp output

All Thermo Scientific Herafreeze freezers feature programmable, easy-to-use microprocessor controls. Our control systems offer real-time visibility and precise setpoints on temperature, power and other critical measurements to continuously ensure the security of your work.

## Thermo Scientific Herafreeze Top

Our Herafreeze Top freezers are suited for laboratories that require sophisticated electronic monitors and alarms for the highest level of sample protection.

### Top Control Panel

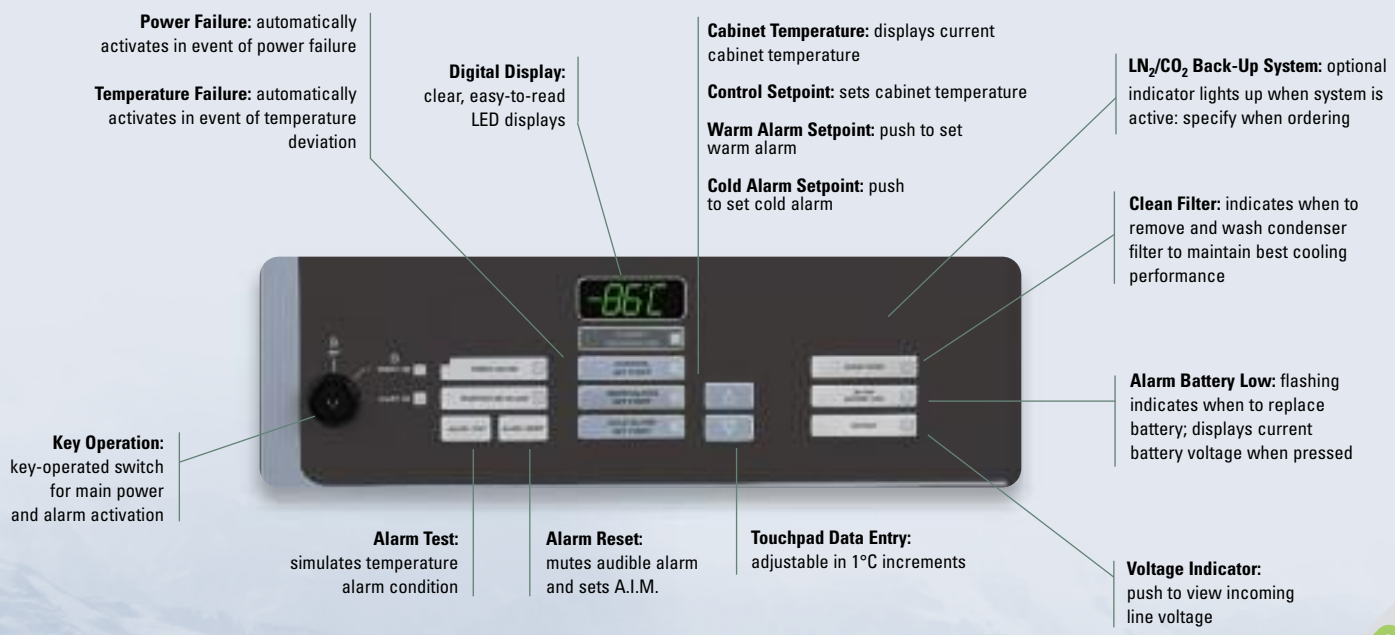

Herafreeze Basic

## Thermo Scientific Herafreeze Basic

**Our Herafreeze Basic freezers are suited for environments that require a moderate level of electronic monitors and alarms for sample protection.**

Herafreeze Top

### Basic Control Panel

Thermo Scientific Nalgene and Nunc cryogenic storage vials give you everything you need to safely store precious specimens, organize freezer space and simplify sample retrieval. Nalgene® and Nunc™ combine to provide one-stop shopping for the widest variety and highest quality of externally and internally threaded cryovials, storage boxes, lab top coolers and controlled-rate freezing containers. New Nunc Cryobank and Bank-It™ cryovials are designed for automated cryogenic storage.
